Combined Joint Task Force

Operation Inherent Resolve

APO AE 09306

Strike assessments are based on initial reports. All aircraft returned to base safely.

A strike, as defined in the CJTF releases, means one or more kinetic events that occur in roughly the same geographic location to produce a single, sometimes cumulative effect for that location. So having a single aircraft deliver a single weapon against a lone ISIL vehicle is one strike, but so is multiple aircraft delivering dozens of weapons against a group of buildings and vehicles and weapon systems in a compound, for example, having the cumulative effect of making that facility (or facilities) harder or impossible to use. Accordingly, CJTF-OIR does not report the number or type of aircraft employed in a strike, the number of munitions dropped in each strike, or the number of individual munition impact points against a target.

The strikes were conducted as part of Operation Inherent Resolve, the operation to eliminate the ISIL terrorist group and the threat they pose to Iraq, Syria, and the wider international community.

The destruction of ISIL targets in Syria and Iraq further limits the group's ability to project terror and conduct operations. Coalition nations which have conducted strikes in Iraq include Australia, Belgium, Canada, Denmark, France, Jordan, Netherlands, the United Kingdom, and the United States. Coalition nations which have conducted strikes in Syria include Australia, Bahrain, Canada, France, Jordan, Saudi Arabia, Turkey, United Arab Emirates, the United Kingdom, and the United States.
