

Combined Joint Task Force Operation Inherent Resolve

June 11, 2018
Release # 20180611-01
FOR IMMEDIATE RELEASE

Operation Roundup targets Daesh remnants

SOUTHWEST ASIA – Combined Joint Task Force – Operation Inherent Resolve and its partners have accelerated offensive activity against Daesh targets in designated parts of Iraq and Syria throughout the months of May and June.

Since the May 1 start of Operation Roundup, Syrian Democratic Forces resumed major offensive operations in the Middle Euphrates River Valley. Since then, the SDF has continued to gain ground through offensive operations coupled with precision Coalition strike support.

During the month of May, the Coalition conducted 225 strikes with 280 engagements. This demonstrates a 304% increase over the 74 strikes conducted in March, and a 123% increase over the 183 strikes recorded in April 2018.

Combined Joint Task Force - Operation Inherent Resolve and its partner forces continue to exert pressure on Daesh senior leaders and associates in order to degrade, disrupt and dismantle Daesh structures and remove terrorists throughout Iraq and Syria. Daesh morale is sinking on the frontlines as privileged Daesh leaders increasingly abandon their own fighters on the battlefield, taking resources with them as they flee.

Over the coming weeks, Operation Roundup will continue to build momentum against Daesh remnants remaining in the Iraq-Syria border region and the MERV. The Coalition remains committed to the lasting defeat of Daesh here, increasing peace and stability in the region and protecting all our homelands from the Daesh threat.

- Near Al Shadaddi, five strikes engaged one Daesh tactical unit and destroyed three Daesh command and control centers and five Daesh-held buildings.

There were no reported strikes conducted in Iraq on June 1, 2018.

This Coalition strike release contains all strikes conducted by fighter, attack, bomber, rotary-wing, or remotely piloted aircraft, rocket propelled artillery and ground-based tactical artillery.

A strike, as defined in the Coalition release, refers to one or more kinetic engagements that occur in roughly the same geographic location to produce a single, sometimes cumulative effect in that location. For example, a single aircraft delivering a single weapon against a lone Daesh vehicle is one strike, but so is multiple aircraft delivering dozens of weapons against a group of Daesh-held buildings and weapon systems in a compound, having the cumulative effect of making that facility harder or impossible to use. Strike assessments are based on initial reports and may be refined.

CJTF-OIR does not report the number or type of aircraft employed in a strike, the number of munitions dropped in each strike, or the number of individual munition impact points against a target. The information used to compile the daily strike releases is based on 'Z' or Greenwich Mean Time.
