## OPERATION INHERENT RESOLVE

### Public Affairs Office

July 26, 2019  
Release # 20190726--01  
FOR IMMEDIATE RELEASE

---

### **Combined Joint Task Force - Operation Inherent Resolve Monthly Civilian Casualty Report**

**SOUTHWEST ASIA--** Since the beginning of operations in 2014, the Coalition and partner forces have liberated nearly 110,000 square kilometers (42,471 square miles) from Daesh, eliminating their self-proclaimed territorial caliphate and freeing 7.7 million people from Daesh oppression. The Coalition will continue to work with partner forces to deny Daesh any physical space and influence in the region as well as deny Daesh the resources they need to resurge.

The Coalition conducted 34,547 strikes between August 2014 and the end of June 2019. During this period, based on information available, CJTF-OIR assesses at least 1,321 civilians have been unintentionally killed by Coalition actions since the beginning of Operation Inherent Resolve.

We follow a rigid targeting process for all of our strikes to ensure strict adherence to the Law of Armed Conflict while attempting to avoid collateral damage. Every accidental loss of life is tragic, and it will remain our goal to take all feasible precautions to avoid putting civilians in danger in our pursuit of a ruthless enemy.

In the month of June, CJTF-OIR carried over 159 open reports from previous months and received seven new reports. CJTF-OIR completed 66 civilian-casualty allegation assessment reports. Out of the 66 completed casualty allegation reports, two reports were determined to be credible and resulted in two unintentional civilian deaths. Of the remaining 64 reports, CJTF-OIR assessed 62 reports as non-credible, and two were duplicates of previous reports. One-hundred reports are still open, including one that CJTF-OIR had previously closed but reopened due to the availability of new information.

The results of each investigation of an allegation will fall into one of two categories, either "credible" or "non-credible." An assessment of "credible" means that our team investigated the allegation and determined that, based on available evidence, more likely than not, the death was the result of Coalition action. A "non-credible" evaluation means that the information we have to assess the allegation, using our available resources, cannot determine, to the standard of "more likely than not", that the death was the result of Coalition action. There could be a number of reasons for this, to include no corroborating strikes at that time or that location, there was insufficient evidence to support the allegation, or there is simply insufficient or overly vague data in the allegation itself.

It is important to note that while the Coalition has a substantial quantity of data at its disposal to investigate every claim, we welcome any information from any source that will enable us to determine the truth. Furthermore, we routinely reopen closed investigations based on new information that might help us attain more accurate results.

# COMBINED JOINT TASK FORCE

## OPERATION INHERENT RESOLVE

### Public Affairs Office

**Credible Reports:** in the two incidents assessed as credible in June, the investigations assessed that the Coalition strike complied with the law of armed conflict. Coalition forces work diligently to be precise during the planning and execution of strikes to minimize the risk of harm to civilians.

1. Jan. 5, 2019, near Marishidah, Syria, via self-report. Coalition aircraft conducted an airstrike against Daesh terrorists. Regrettably, two civilians were unintentionally killed and another unintentionally wounded due to the proximity of the strike.
2. Jan. 20, 2019, near Ash Shajilah, Syria, via self-report. Coalition aircraft conducted an airstrike against Daesh terrorists. Regrettably, two civilians were unintentionally wounded due to the proximity of the strike.

**Non-Credible Reports:** after a thorough review of the facts and circumstances of each civilian casualty report, CJTF-OIR assessed the following 62 reports as non-credible. At this time there is insufficient information to assess that, more likely than not, a Coalition action resulted in civilian casualties.

1. Jan. 14, 2017, in Al Mayadeen, Syria, via Airwars report. After a review of all available records it was determined that, more likely than not, civilian casualties did not occur as a result of a Coalition action.
2. Jan. 26, 2017, in Western Mosul, Iraq, via Airwars report. After a review of all available records it was determined that, more likely than not, civilian casualties did not occur as a result of a Coalition action.
3. Apr. 7, 2017, in Hamra Ghanem, Syria, via Airwars report. After a review of all available records it was determined that, more likely than not, civilian casualties did not occur as a result of a Coalition action.
4. May 28, 2017, in Raqqa, Syria, via Amnesty International report. After a review of available information it was assessed that no Coalition actions were conducted in the geographical area that corresponds to the report of civilian casualties.
5. May 30, 2017, in Raqqa, Syria, via Amnesty International report. After a review of available information it was assessed that no Coalition actions were conducted in the geographical area that corresponds to the report of civilian casualties.
6. Jun. 1, 2017, in Raqqa, Syria, via Amnesty International report. After a review of available information it was assessed that no Coalition actions were conducted in the geographical area that corresponds to the report of civilian casualties.
7. Jun. 10, 2017, in Raqqa, Syria, via Amnesty International report. After a review of available information it was assessed that no Coalition actions were conducted in the geographical area that corresponds to the report of civilian casualties.
