Release No. 20200908-01  
**FOR IMMEDIATE RELEASE**

## **CJTF-OIR Strike Summary Report, June 2020**

**SOUTHWEST ASIA** – Combined Joint Task Force – Operation Inherent Resolve and its partners continue to target and pursue the enduring defeat of Daesh.

CJTF-OIR and partner forces have liberated nearly 110,000 square kilometers (42,471 square miles) from Daesh. As a result, 7.7 million people no longer live under Daesh oppression. CJTF-OIR remains committed to the enduring defeat of Daesh to improve conditions for peace and stability in the region and to protect all our homelands from the Daesh terrorist threat.

### **Strike Summary**

Between June 1 and June 30, 2020, CJTF-OIR conducted a total of 26 strikes consisting of 89 engagements in Iraq and Syria.

In Iraq, CJTF-OIR conducted 20 strikes against Daesh targets consisting of 78 engagements. This resulted in 20 enemy killed, 10 caves destroyed, 3 camps destroyed, 13 bed down locations destroyed and three terrain denial operations.

In Syria, CJTF-OIR conducted six strikes against Daesh targets consisting of 11 engagements. This resulted in two enemy killed and five terrain denial operations.

This CJTF-OIR strike release contains all strikes conducted by fighter, attack, bomber, rotary-wing, or remotely piloted aircraft, rocket propelled artillery and ground-based tactical artillery.

A strike, as defined in the CJTF-OIR release, refers to one or more kinetic engagements that occur in roughly the same geographic location to produce a single, sometimes cumulative effect in that location. For example, a single aircraft delivering a single weapon against a lone Daesh vehicle is one strike, but so is multiple aircraft delivering dozens of weapons against a group of Daesh-held buildings and weapon systems in a compound, having the cumulative effect of making that facility harder or impossible to use. Strike assessments are based on initial reports and may be refined.

CJTF-OIR does not report the number or type of aircraft employed in a strike, the number of munitions dropped in each strike, or the number of individual munition impact points against a target. The information used to compile the daily strike releases is based on 'Z' or Greenwich Mean Time.
