

COMBINED JOINT TASK FORCE

OPERATION INHERENT RESOLVE

Public Affairs Office

December 5, 2018

Release # 20181205-01

FOR IMMEDIATE RELEASE

Operation Roundup targets ISIS remnants

SOUTHWEST ASIA – Combined Joint Task Force – Operation Inherent Resolve and its partners continue to pursue the lasting defeat of ISIS in designated parts of Iraq and Syria.

Operation Roundup, which began May 1 for the defeat of ISIS in the Middle Euphrates River Valley and Iraqi- Syrian border region, has continued to gain ground and remove terrorists from the battlefield through offensive operations coupled with precision Coalition strike support.

Combined Joint Task Force - Operation Inherent Resolve and its partner forces' operations are exerting pressure on ISIS senior leaders and associates, as well as degrading, disrupting and dismantling ISIS organizational structures throughout Iraq and Syria.

Operation Roundup will continue to target ISIS remnants as the Coalition remains committed to the lasting defeat of ISIS to increase peace and stability in the region, and to protect all our homelands from ISIS's terrorist threat.

Weekly Strike Summary

Between Nov. 25 and Dec. 01, CJTF-OIR conducted 90 strikes consisting of 151 engagements in Syria and Iraq.

On Dec. 01 in Syria, Coalition military forces conducted 12 strikes consisting of 18 engagements against ISIS targets.

COMBINED JOINT TASK FORCE

OPERATION INHERENT RESOLVE

Public Affairs Office

Between Nov. 25 and Dec. 01, CJTF-OIR detected 45 strikes from other actors that crossed the Euphrates River Valley. CJTF-OIR is committed to avoiding and in every case minimizing civilian casualties; CJTF-OIR calls on all other actors in the area to observe the same precautions.

This Coalition strike release contains all strikes conducted by fighter, attack, bomber, rotary-wing, or remotely piloted aircraft, rocket propelled artillery and ground-based tactical artillery.

A strike, as defined in the Coalition release, refers to one or more kinetic engagements that occur in roughly the same geographic location to produce a single, sometimes cumulative effect in that location. For example, a single aircraft delivering a single weapon against a lone ISIS vehicle is one strike, but so is multiple aircraft delivering dozens of weapons against a group of ISIS-held buildings and weapon systems in a compound, having the cumulative effect of making that facility harder or impossible to use. Strike assessments are based on initial reports and may be refined.

CJTF-OIR does not report the number or type of aircraft employed in a strike, the number of munitions dropped in each strike, or the number of individual munition impact points against a target. The information used to compile the daily strike releases is based on 'Z' or Greenwich Mean Time.
