Release # 20190507-01

FOR IMMEDIATE RELEASE

CJTF-OIR Strike Summary April 21 - May 04, 2019

SOUTHWEST ASIA – Combined Joint Task Force – Operation Inherent Resolve and its partners continue to target and pursue the enduring defeat of Daesh.

CJTF-OIR and partner forces have liberated nearly 110,000 square kilometers (42,471 square miles) from Daesh; as a result, 7.7 million people no longer live under Daesh oppression.

CJTF-OIR remains committed to the enduring defeat of Daesh to improve conditions for peace and stability in the region, and to protect all our homelands from Daesh's terrorist threat.

Strike Summary

Between April 21 - May 4, 2019, CJTF-OIR conducted 10 strikes consisting of 40 engagements against Daesh targets in Iraq, there were no strikes conducted in Syria.

In Iraq, CJTF-OIR conducted 10 strikes consisting of 40 engagements, engaged four Daesh tactical units, and destroyed three tunnels, two buildings, two weapons caches, two supply routes, and one cargo container.

Between April 21 - May 4, 2019, CJTF-OIR detected 18 strikes from other actors that crossed the Euphrates River Valley. CJTF-OIR is committed to avoiding and in every case minimizing civilian casualties; CJTF-OIR calls on all other actors in the area to observe the same precautions.

This Coalition strike release contains all strikes conducted by fighter, attack, bomber, rotary-wing, or remotely piloted aircraft, rocket propelled artillery and ground-based tactical artillery.

A strike, as defined in the Coalition release, refers to one or more kinetic engagements that occur in roughly the same geographic location to produce a single, sometimes cumulative effect in that location. For example, a single aircraft delivering a single weapon against a lone Daesh vehicle is one strike, but so is multiple aircraft delivering dozens of weapons against a group of Daesh-held buildings and weapon systems in a compound, having the cumulative effect of making that facility harder or impossible to use. Strike assessments are based on initial reports and may be refined.

CJTF-OIR does not report the number or type of aircraft employed in a strike, the number of munitions dropped in each strike, or the number of individual munition impact points against a target. The information used to compile the daily strike releases is based on 'Z' or Greenwich Mean Time.
